Profile

Senior Software Engineer with 9+ years building production React/TypeScript applications, from fintech platforms to enterprise security dashboards, plus Python backend ownership and hands-on AI integration experience.

Experience

Software Engineer, JointechAI – Tijuana, Mexico Aug 2022 – present

Contracted through Borderux to **Viasat**, the primary end client for the full tenure.

- **Viasat Internal Security Application:** Architected a centralized React and TypeScript dashboard aggregating security findings for 4,000+ internal users as the sole frontend engineer in a 15-engineer team.
- **Viasat Python Backend:** Owned backend features end to end in the platform's Python services.
- **Jointech Agentic HR & CRM App:** Led an agentic HR and CRM platform for 30 employees with 3 junior devs and 1 designer.
- **Reciplease (Borderux side project):** Shipped to production a public app that extracts food blog recipes and processes them through an AI agent into readable and interactive recipes, with a Python backend and React frontend on GCP (Firebase).

Software Engineer, Arte Digital – Tijuana, Mexico Jan 2020 – Aug 2022

- **Captira:** Engineered full-stack legal software solutions, developing complex Angular data dashboards and secure Laravel APIs serving 3,000+ legal professionals.
- **SMB Client Projects:** Managed end-to-end development of 10+ custom WordPress websites, handling server configuration, PHP plugins, and complete frontend design.
- **Crediverso:** Architected and built full-stack fintech features for a platform serving 10,000 users, utilizing React and a Headless WordPress backend. Reduced deployment time by establishing CI/CD pipelines using Codeship.

Web Designer & Developer, LuballSoftware (Freelance) – Tijuana, Mexico Mar 2016 – Jan 2020

- Developed and managed FireApp, a digital logging application for the Tijuana Fire Department used by 180+ field firefighters and paramedics across 18 stations for pre-hospital incident reports.
- Delivered 25+ web solutions for local businesses over 4 years, ranging from custom e-commerce platforms to landing pages.

Education

Universidad Tecnológica de Tijuana, BS in Tecnologías de la Información – Tijuana, Mexico May 2015

Skills

Frontend: TypeScript, React, JavaScript (vanilla / jQuery), SCSS, Pixel-perfect design implementation

Backend & Databases: Python, NodeJs, PostgreSQL, Firebase, Laravel, Angular

Cloud & DevOps: Google Cloud Platform, Amazon Web Services, CI/CD (Github Actions), Software Architecture

AI & Emerging: AI Models RAG, Fine Tuning, Alops

Other: Git, Hybrid development apps, Product Requirements Analysis

Languages

English: Professional proficiency

Spanish: Native
